POLICAR, THE '60s AND '70s ICONIC BRAND OF GREAT ITALIAN SLOT CARS AND TRACKS

A passion that runs through generations, to be cherished for years to come. Designed in the heart of Emilia Romagna in Italy, where motorsport is at home, by the Slot.it Team, the world reference for performance cars and spares. A quality 1/32 track design, a complete recreation of car racing.

Chi POLICAR vince!

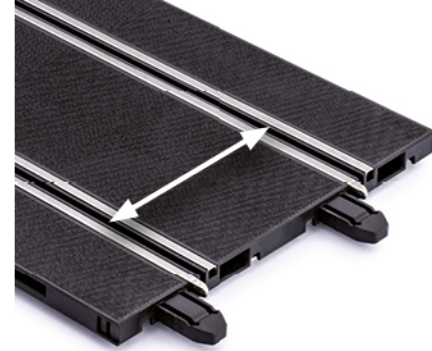

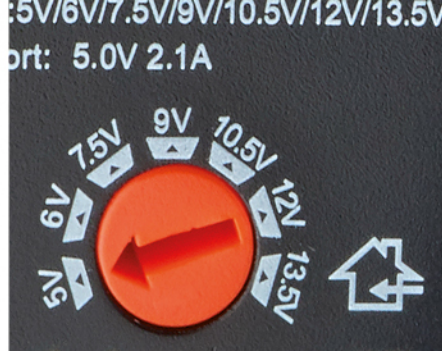

WHY YOU SHOULD BUY A POLICAR TRACK

There are many good reasons to choose a Policar track rather than another brand for your next layout. With twenty years of experience in competitions and major events, we wanted to create a quality product which may be used for professional layouts as well as being mounted on the carpet on December 25th, like we did with our fathers or grandfathers: the "Christmas track box".

MULTIPLE LATERAL CLIP SYSTEM

Keep that huge multi lane layout that you've been secretly dreaming of, aligned and flat!

ADJUSTABLE POWER SUPPLY

The best upgrade your money can buy... is INCLUDED in every POLICAR set (this may change by country - please check locally). The indispensable accessory for children, novices and experts: adjustable on seven positions with plenty (24W) of power.

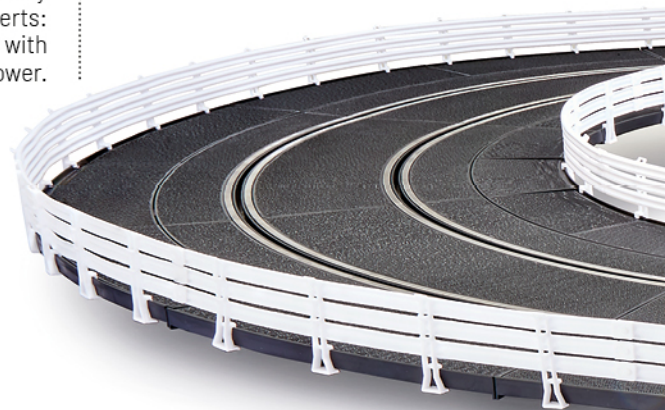

LANE SPACING IS 9 cm (3.54")

The ideal lane spacing for 1/32 racing. Period.

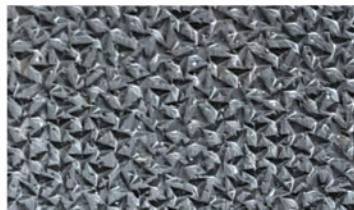

SPECIAL TRACK SYSTEM GEOMETRY! (PATENT PENDING)

We sat at the drawing board with the intent to make it easier to create your own circuits. In the new POLICAR track, any constant radius 90° turn can always be replaced with any other constant radius 90° turn: regardless of whether you're using R1, R2, R3, or R4 pieces! To put it simply: all of the above curve assembly pieces are interchangeable. So, if for example you grow tired of your layout, you can easily replace a 90° R1 turn with a 90° R3 without trouble. Guaranteed by geometry.

HARD HIGH GRIP PLASTIC

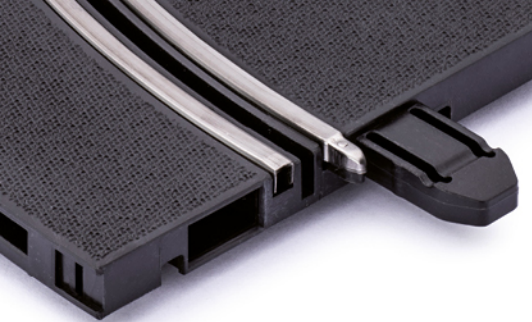

Plastic is hard and firm, with a special surface texture to guarantee excellent grip, even without traction magnets.

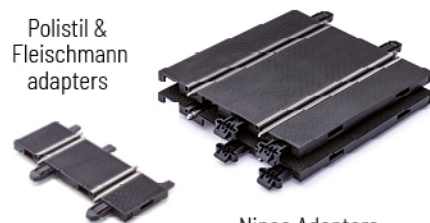

A GUARD RAIL THAT ACTUALLY WORKS!

Triple rail guardrail. Stays in place when you need it and saves the bacon.

Polistil &
Fleischmann
adapters

Ninco Adapters

RUST RESISTANT STEEL RAILS

...and great conductivity too!

THREE WIRES CONTROLLER

Automatic 'braking'
action when the trigger is
released.

COMPATIBLE WITH MAJOR BRANDS

Compatible (with adapters) with Ninco
and Fleischmann 1/32 tracks, and
with Polistil/Policar 1/32 tracks made
between 1970 and 2000.

EXTRA WIDE BORDERS

6cm (2.36") wide borders, with the same
texture of the track. They clip in place like
they should, and even work on bridges!

Chi POLI CAR vince!
